

UNCOMPROMISED[®]
CHECK SOLUTIONS
SECURITY ★ DELIVERY ★ VALUE

Uncompromised Check Solutions is a state of the art product offering of software compatible standard and custom laser checks and accessories. The finest laser check security options with unmatched delivery and value are standard features of Uncompromised Check Solutions.

Security features help reduce the risk of liability in cases of fraud. Enhanced security is well worth the cost even if it only prevents fraud one time.

Various levels of security are available, from basic features to high level options such as a hologram fused to your check. Choose the enhanced security features that best suit your needs while taking advantage of the basic security features that are included in all Uncompromised Check Solutions checks.

Basic Security Features (included in all Uncompromised laser checks)

Thermochromic Icon – a heat sensitive stop sign icon that disappears when exposed to heat.

Diagonal Dimensional Backer – different spacing of diagonal lines used as an anti-cut and paste device.

Padlock Icon – a registered certification mark of the Check Payments Systems Association.

Microprint – small type in the endorsement line that appears as a dotted line when photocopied.

Warning Band – alerts the handler the document contains security features.

Toner Adhesion – a product applied to the paper to help fuse the toner to the sheet under the heat process. Products without this toner adhesion are more prone to having the toner (text) lifted by tape.

Chemical Protection, Visible Fibers, Invisible Fibers, Security Background and either a True Fourdrinier or Artificial Watermark may be included in every laser check we sell.

Uncompromised Check Solutions currently offers software compatible templates for:

Accpac, Yardi, MYOB GP	MAS 90 / MAS 200 GP (Top Check)	Quickbooks 3 on a page Check w/ lines

Available in Styles:

- Granite
- Parchment
- Linen

Format 410

Available in Styles:

- Hologram Secure (Blue only)
- Financial Secure

Uncompromised Check Solutions Standard Offering

Available Base Stock Designs and Colors

Hologram Secure

A Hologram is a three dimensional metallic image fused to the sheet. Holograms are one of the most unique and effective deterrents to forgery. The advanced optical technologies used have two main advantages: they are instantly recognizable to the naked eye and uniquely resistant to counterfeiting. Hologram Secure Checks are the premier choice when trying to protect official documents from forgery.

Blue

Burgundy

Green

Gray

Tan

Teal

Foil Secure

Foil Secure Checks contain a prismatic background in Green – Peach – Green with a foil bar. A prismatic background is a blend of two or more colors to create a gradient effect, change density and blend together. The color variation as well as the three dimensional background make these designs difficult to replicate, further protecting your documents from fraud.

The foil in the bar enhances the appearance and cannot be replicated using a color copier or scanner.

Green

Peach

Green

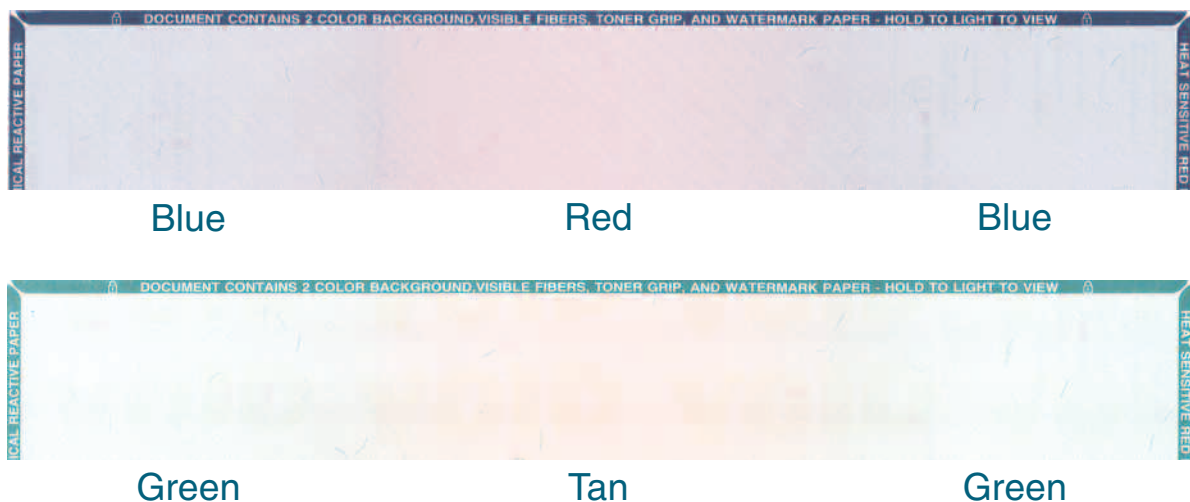

3D Secure

3D Secure Checks are prismatic checks with the word Secure in the background making the check design extremely difficult to duplicate. The two choices of prismatic colors are Burgundy – Grey – Green and Blue – Rose – Yellow. The word Secure appears three dimensionally in the body of the check.

Financial Secure

Financial Secure Checks offer you a choice of two - three color prismatic backgrounds, Blue – Red – Blue or Green – Tan – Green.

Hologram Secure, Foil Secure, 3D Secure and Financial Secure Checks are printed on Security Gate® Premium, the finest security paper available. Security Gate® Premium paper includes a True Fourdriner Watermark and Toner Adhesion, one of the most effective fraud protection options available. Protect your business by choosing from one of our premium security designs.

Uncompromised Check Solutions Standard Offering

Unique check backgrounds can enhance your business image as well as provide security. These backgrounds are difficult to duplicate and the warning bands alert the handler that the check contains security features. Choose from a variety of colors in three distinctive textures.
