C Model TG1 TensaGuide

Most places in the U.S. that are open to the public are required to comply with either ADA or UFAS regulations.

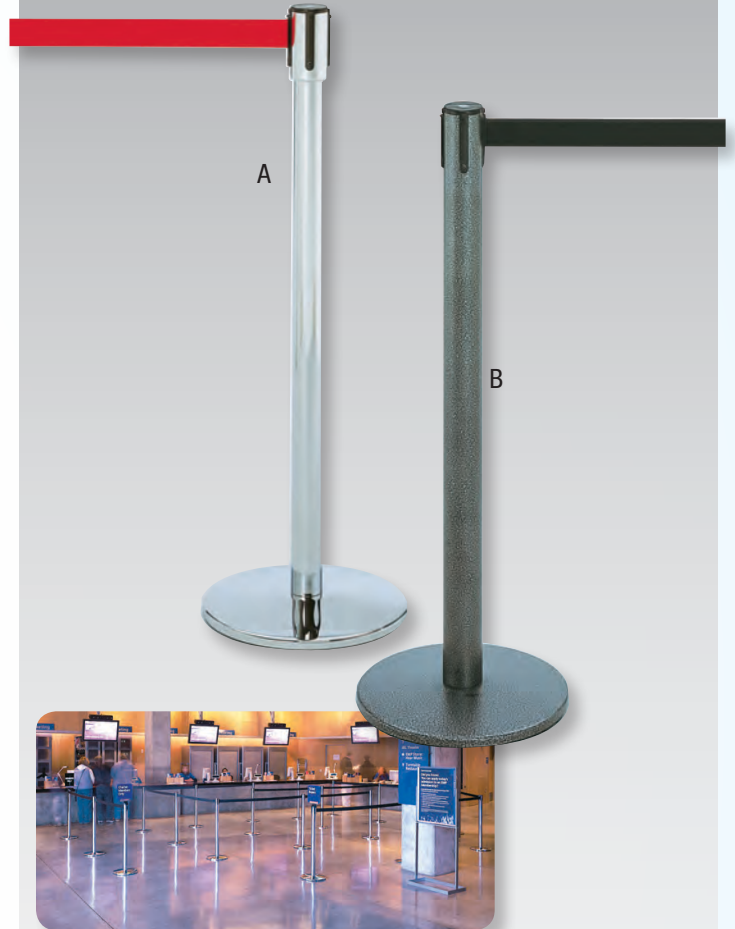

Our new TensaGuide single-tape post is specifically designed to comply with ADA/UFAS 4.4.1, by positioning the tape less than 27" from the floor surface. At this height, the tape can be detected by the visually impaired employing a cane or guide dog, while still providing effective crowd control for the public at large. TensaGuide posts also do a terrific job at discouraging "line-ducking" and controlling children. In addition, they come with a solid metal top, which can accommodate signage up to 22" x 28" without the use of an adapter cone.
